

The PCH Ecosystem is an open innovation programme with focus on development of innovative concepts, digital services and e-Health applications that connect to Personal Health Records.

Goal:

To create an ecosystem around a personalized data-platform for citizens. The ecosystem makes innovations possible for small and medium-sized enterprises in Northern Netherlands.

Wide scope: health, prevention, wellbeing and safety

Scale size: amount of users

Sharing knowledge and expertise: also to meet legislation and regulations (e.g. GDPR and MDR)

- Funding: maximum 40% of total project costs
- Subsidy proposals of project consortia: apply before 01-07-2022 (end date of projects: 31-03-2023)
- UMCG is initiator and coordinator of PCH Ecosystem
- More information: www.pchecosysteem.nl or pch@umcg.nl
